

g r a n d p r i x e q u i n e

Following is a comprehensive list of radiographs for a purchase exam for Dr. Mark R. Baus and his client. Certain views can be deleted for the sake of economy and after discussion with the buyer or their agent.

- Front limbs [shoes removed]:
 - 60 degree DP and skyline of each navicular bone
 - DP of front feet and fetlock [combined] with 10 degree downward angle.
 - Separate lateral views of the front feet [aimed at ground level] and the fetlock.
 - Oblique views of fetlock and pastern [I prefer these views with each foot placed on a 3-4 inch block and a 10 degree downward angle aimed at the mid-pastern region, it will show oblique views of the coffin joint, pastern joint and fetlock joint].
- Hind limbs
 - 4 views of each hock (DP, lateral and obliques)
 - Lateral, DP and oblique views of hind fetlocks
 - Lateral and caudal-cranial views of each stifle
- Back (if necessary based on findings)
 - 3-4 views of dorsal spines from the withers to the lumbar region.

Once completed, please send the radiographs to Dr. Baus via email (mbaus@grandprixequine.com) or send CD to 434 Main Street South; Bridgewater, CT 06752; (203) 470-1431. Thank you very much for your assistance.
